

Church 2023

Structure:

A. Foundation:

The northwest corner of church has vernier concrete busted. The stairs cap going to basement is busting.

B. Floor joist:

A structural engineer has passed joist on main level. The structure its self has been approved also.

C. Subfloor:

Original hard wood flooring has been removed throughout. Parish council has given approval for new subfloor 4 x 8 sheets to be laid.

D. Plaster:

Need to determine where to stop and start with removal. As of June 22, 2023 they were still removing soften plaster.

E. Stained glass windows:

There are two windows completely gone on west side upper level. Some windows broken; some are warped from heat. This is a company I know of that repairs-Stained glass windows: Mominee Studio.vcf business out of Evansville Ind. 1-812-473-1691, roughly 2 years out.

F. Insulation in attic:

Process is being approached

G. Metal Shingles:

Perhaps this needs to be looked at

H. Ventilation:

On the south end of building up in the arches there are 2 vents, one on the west side and one on the east side. They have both been torn out to gain access to fire.

Pg. 2

Electric

A. All wiring needs to be checked, there is a process started on getting bids for wiring of church. We ask for 2 bids, one being, bid as was, the other with upgrades. Getting all wiring up to code. Following are the items that will need replaced:

B. A/C and heating systems

C. Lighting

D. Sound system

E. Bell tower system

F. Pipe organ

G. Plugs/switches

H. Security System

I. Internet services

Church
Pg 3

Balcony:

The upstairs balcony to the west is completely burned. All material has been removed. The following is the items to be installed:

- A. Installing new floor joist to west
- B. Sub flooring to put down/main flooring
Install ceiling under the balcony
- C. Seating
- D. Storage of music
- E. Railing
- F. Pipe organ and piping
- G. Need to know how much electric is required and or needed, that can also be tied into overall sound system.
- H. Rhonda, other needs?

Church 2023

Pg 4

This is a list of items that need to be approached.

Removal of all remaining wood items? So that all exposed wood is stained the same color.

1. Reredos
2. Tabernacle
3. Base board / wainscoting rail
4. Window sills
5. Old speakers
6. Old lighting
7. Mary and Joseph statues and basses
8. Door trim
9. All exterior wood doors

Where the old heaters were sitting along outside walls, are we going to build those indents out to make flush walls?

Church pews are cleaned, are they going to be stripped down sanded and re finished?

Same with kneelers, leather tops are probably damaged

Church 2023

Pg 5

Things that could be considered adding to church

1. Bath room
2. Cry room
3. Carport
4. Gathering area
5. Permanent Baptismal font
4. Everything needs to be up to code

Electric, handicap access to altar and podium area, exits located, emergency lighting, C.O. alarms, smoke detectors

After all the above items from past 4 pages are addressed, we can move forward with design plans of lay out of building, color scheme, flooring-carpet, tile, wood, lighting choices, stain colors and so much more!!!

We all understand that we are just one committee that has volunteered our time, there are multiple agencies that this process must go through before it is reality.
